

# Increased productivity and reduced costs

Low power consumption<sup>1</sup>, reduced intervention and fast First Page Out Time (FPOT)<sup>2</sup> make the new Epson WorkForce Pro mono printers the ideal way to increase your productivity while cutting your total cost of ownership (TCO).

### High productivity and low intervention

Increase productivity with a fast First Page Out Time (FPOT) of 4.8 seconds from ready<sup>2</sup>. You can also print up to 40,000 pages without changing supplies with a high ink yield<sup>3</sup>. With these printers, intervention is minimal, thanks to a paper capacity of up to 1,830 sheets (3x optional 500 sheet cassettes), which means less time spent refilling paper.

### The money-saving option

Great reliability, low Total Cost of Ownership (TCO) and fewer replacement parts make the printers an attractive choice for businesses on a budget.

### Reduce your environmental impact

Thanks to fewer replacement parts and consumables, and low power consumption, with these printers you reduce the environmental impact of your business operations.

### Easy operation and integration

Automatic duplex printing, single-pass duplex scanning, fax and copying, along with PDL compatibility, including PCL and PostScript 3, mean these business inkjets make any job easy and efficient. They also feature a simple paper path and non-contact printing which allows it to print on a wide range of media including recycled paper, glossy media and envelopes.

### Built for business

Perfect for small workgroups, the WorkForce Pro printers are compatible with a variety of software solutions that can be integrated into your IT infrastructure to improve efficiency. Epson Print Admin creates a secure printing environment through user-authentication. Epson Remote Services (ERS), with the device embedded agent, offers a cloud-based device monitoring and management system. Finally, Epson Open Platform enables compatibility with third-party solution partners like PaperCut, MyQ, Y Soft and more.\*
