# **B400** Series

Printers the whole team can depend on every day, with

absolute confidence.

#### Smart. Solid. Simple.

In our experience, simplicity equals reliability. And that's what you can expect from our B400 Series printers - a robust, simple design with ultra-reliable digital LED print technology for monochrome printing with absolute confidence.

The simple fact is that digital LED print heads have no moving parts. There's nothing to wear out and hardly anything to go wrong. That's why we're able to guarantee them for at least five years.

Combine that with intelligent design and a range of handy utilities and you'll see why OKI printers just keep on printing, page after page and day after day. They're just what you need for a busy office.

# Dependable performance

Regardless of which model you choose, you'll find that the first page appears in just 5.5 seconds and the rest follow at an impressive 28 pages per minute (ppm) - speeds you can be confident of, thanks to a powerful processor and a generous memory that's expandable right the way up to 320MB.

### Everything you need

As you would expect from OKI, the B400 Series gives you everything you need from a desktop printer.

Depending on the particular model - and there are five to choose from - you'll get true 1200 x 1200dpi resolution for professional high quality output, a paper capacity of up to 1,110 sheets and cost-effective high capacity toner cartridges (up to 10,000 pages) help you print more, for longer. What's more, every model comes with automatic two-sided printing as standard, saving paper and reducing costs.

# Easy to live with

Every model in the B400 Series has that famous OKI ease of use. A large, front-facing LCD display gives clear, at-a-glance status information, and there's a whole suite of powerful productivity software to make life in the office easier than ever.

And that's OKI. Reliable, high quality printers that everyone in the office can depend upon.

#### Which one's right for you?

Each printer in the B400 Series features digital LED print technology for maximum reliability and fewer interruptions.

The B410d is ideal for dependable personal printing. It features a top resolution of 2400 x 600dpi and an input capacity that can be expanded to almost 800 sheets. A network version, the B410dn, is also available.

■ The B430d offers longer uninterrupted printing and has true 1200 x 1200dpi resolution for crisp, sharp detail. Its enhanced operator panel, optional high capacity toner cartridge and increased paper capacity make it a great choice for heavier workloads. For networked environments, choose the B430dn.

■ The B440dn offers powerful yet affordable desktop performance for small workgroups. With its high duty cycle, a paper capacity that's expandable to 1,110 sheets and the potential for using toner cartridges that will last for up to 10,000 pages, this is the printer of choice for busy offices

	B410d	B410dn	B430d	B430dn	B440dn
Print speed (A4)	28ppm				
Paper capacity	250			530	
Paper sizes	A4, A5, B5, A6, Letter, Legal 13 & 14, Executive, Statement

# Powerful productivity software

The B410, B430 and B440 are complemented with useful utilities to help you get even more value from these reliable desktop printers:

- Print Control for tracking usage and controlling access for tighter cost control.
- PrintSuperVision browser-based monitoring and management of all your network printers, regardless of make or model.
- Template Manager 3.0 editable, easy to use templates for creating a wide range of office documents.
