Network Scanning...

Information on the Move

The Brother ADS-3000N desktop document scanner is simple to set up, robust for continued office use and reliable for uninterrupted professional scanning of vital documents.

Offering true network capability, business critical information can be sent directly to a desired Network folder location, improving workflow efficiency and increasing productivity.

ADS-3000N

ADS-3000N Features

Multifeed Detection uses sound waves to identify potential misfeeds. The paper pathway is automatically suspended and the user alerted if an irregular signal is detected, reducing the risk of damaged documents and lost data.

The Advanced Reverse Roller system manages incoming bulk paper jobs so only one sheet is processed at a time, for outstanding reliability when scanning a variety of document types and weights.

- Incorporating SuperSpeed USB 3.0 for rapid and efficient processing.

- The ADS-3000N supports TWAIN and ISIS drivers for software integration and image processing.

Wired Network

ADS-3000N document scanners offer true network scanning without having to log on to a central PC or install software at multiple location points. Share information across teams and departments with minimum user involvement.

Scan Features

To support cross function scanning, the ADS-3000N scans to email, File, Image, Network, OCR software, SharePoint, USB Host and FTP/SFTB.
High Productivity

Brother's ADS-3000N is built for professional business usage with scan speeds of up to 100ipm (50ppm) and a large 50 sheet capacity document feeder capable of scanning 27 to 413gsm^2 paper weights.

Fast Input, Reliable Output

The ADS-3000N uses a wider output tray to neatly capture paper fed through the ADF. Trays are angled to encounter less paper resistance so paper can glide easily and stack smoothly, reducing paper folds.

Using programmable buttons, scanned documents can be sent instantly to pre-selected destinations for quick and simple scanning, saving time and staff training.

ADS 2.0 scanners efficiently process a wide range of mixed document materials, paper weights, colours, sizes and also plastic cards.

The scan to USB host feature allows the connection of an external storage flash drive up to 64 GB so users can instantly make their scanned documents portable.
