Less is often more.

Make your office life easier – with a true all-rounder when it comes to reducing workloads and saving space. The new A3 b/w multifunctional systems help you to copy, print, scan, manage your paper and finish your documents. Does that sound complicated? It's actually very easy thanks to flexible options for expansion and intuitive user guidance. The systems are operated via a 9-inch colour touch display (with a picture diagonal of 22.86 cm) that you can adapt to suit your requirements.

The systems are also energy-efficient and conserve resources thanks to functions such as 'Skip Blank Pages' where blank pages are filtered out during scanning and copying – and that's good for the environment.

What you can expect:

Intelligent paper management: The systems offer a maximum paper capacity of 7,150 sheets from six paper feeds*. Paper weights of 52 to 300 g/m² and formats ranging from A6 to SRA3 are processed from the paper cassette. Optional finishing options allow you to output your print jobs with tri-folding for letters, as stapled and hole-punched documents or as dispatch-ready brochures. The 270-sheet dual scan original feeder* sets new standards for fast scanning in a single operation with gentle handling of original documents.

Vastly expandable: The HyPAS interface allows you to integrate optional software solutions into your system and also introduce your own customised software. Accessing the system via a smartphone or tablet isn't a problem either using a free Mobile Print app or the Apple AirPrint protocol. You can even scan documents in the cloud this way. In addition, the systems feature an NFC interface for direct printing from an Android smartphone or tablet*.

Fast document creation: You can start your first print job after a short warm-up time of only 17 seconds. Afterwards, the systems print up to 60 pages per minute. An optional scanning extension allows you to create text-searchable PDF files. Your texts are ready in no time at all without the hassle of retyping.

Simplest operation: If you know one, you know them all. The usability of our new systems has been further revised in accordance with this principle. Whether you're using the large 9-inch colour touch display or operating the standardised printer driver, you'll quickly find your way around all the systems of this product group, particularly due to the wide range of individual customisation options.
